C. W. ROSSELL.

Weekly News Bulletin.

Extension of the time for redeeming lands sold in the 1921 tax sale has been extended by the Provincial Department of Municipal Affairs to Oct. 31, 1923. This extension of time for redemption applies to all parcels of land other than those situated in cities and other than unimproved divided land within the meaning of the tax sale relief act, which were sold for taxes in 1921.

The Dept. of Agriculture has arranged to transport students from Youngstown and Gleichen districts free, to the schools of agriculture at Olds, Claresholm and Raymond. These three, with the one at Vermilion, will be the four operated the coming season, which opens Oct. 31.

Parties of prominent people visiting Alberta during September include the members of Montreal Board of Trade; the British Empire Exposition Commission, who are in Edmonton this week; also 400 passenger agents of Canadian and U. S. railways, who are meeting in Calgary.

The Alberta Government exhibit for fairs in Western States has been shipped to Billings, Mont., where the Midland Empire Fair is held. The exhibit then goes to the Colorado State Fair at Pueblo, Colo.

Shipments of grain to the new Government cleaning plant at Edmonton have commenced. The first to take advantage of the Seed Grain marketing plan is Mr. R. D. Lynch of Chaymore, who has shipped a consignment of Kitchener seed wheat to the new plant.

Holborn Drainage District

A matter of great interest to those in the Holborn and surrounding districts, which has been under discussion for the past few years, will shortly be brought to a head, if the negotiations which Mr. J. E. Meisner has had with the Department of Public Works prove successful. This is the matter of the formation of a Drainage District in the area mentioned. The preliminary announcement appears in the shape of an official advertisement in another column of The Sun, as per The Drainage Districts Act of 1921.

This is a very important matter to those who live in the proposed district; and those about to be affected should make an effort to keep themselves posted on the various procedures.

Information may be obtained from Mr. J. E. Meisner or from the chairman of the Drainage Council, Edmonton.

Notice to Grain Shippers.

The following important notice has been sent out by Secretary Hetherington, of the Board of Grain Commissioners for Canada:

"Farmers and other shippers of grain desiring information as to whether the parties to whom they intend delivering their grain have applied for a license and furnished a bond or not, or any other information, are requested to inquire by wire or mail from the Board of Grain Commissioners for Canada at Fort William, Ontario. All inquiries will be given prompt attention and fullest information available will be furnished.

LOCAL NEWS.

Mr. and Mrs. Landy motored to the City on Monday.

Mrs. Outway was taken to an Edmonton hospital last week, for treatment.

Officer Cavanagh returned on Saturday from a three day trip to Rocky House.

Mr. Wm. Graham, from Medicine Hat, is visiting friends at Comat.

Mrs. Tina Graham's condition is much improved.

Tuesday's visitors were: Piper McKinnon, Eaton, and Mr. D. A. Stuart and wife, Delta. Mr. F. G. Schmidt, Strathcona, was here on Wednesday.

Mr. Murray returned from Jenkins on Sunday.

Mr. Ralph Graves returned to Hutton, B. C. yesterday, after a short vacation spent with friends in this district.

A very merry party from there attended the dance at Granville on Friday night.

Wong June, whombers, meals will not be served before 7 a.m. in the morning.

On account of the fog early Saturday morning, torpedoes were placed on the track to halt the Vancouver express, to take on passengers at this station. A number of the towns light, suspects thought there was a burglarious attack, and when bank hour arrived a report was in circulation that several clerks had been shot. A survey showed each in his respective cage.

A very successful sale was held on Saturday last by the Ladies' Aid of the Methodist Church, when a large assortment of home-cooked articles were disposed of.

The grain prices on page 8 are the quotations of yesterday noon. Wheat made a sensational up-jump of 6c a bushel Monday, on war talk, but receded the same amount the following day.

The Imperial Oil Co. has placed an oil and fuel-delivery tank at this point.

Mr. Zicht has pulled his threshing outfit up to Blueberry district, where the good crops are.

Price of meals at Williams Restaurant have been reduced to 21 meals \$7, or 40c a meal.

Game licenses may be procured at The Sun Office.

Mr. Hobson's Lecture.

A very meagre crowd greeted the speaker at the meeting last Sunday afternoon, in Ducholke's Hall, held under the auspices of the International Bible Students' Association. The next Public Meeting to be held in Stony Plain by the I. B. S. A. has been announced for Sunday, September 24th at 3.00 P. M. subject: "Why Jesus came to Earth: The way to Life opened. Speaker, C. W. Braunscombe."

Threshing Specials for Week-end at Hardwick's: Gloves, Overalls, Etc.

It makes you feel splendid

National Land Settlement

To all new countries immigration is a matter of vital national importance, just as emigration becomes a matter of individual and national necessity in older countries with teeming populations and a restricted land area.

For a century the United States was the mecca of the hard-pressed European emigrant, and the present population of more than one hundred million which the United States can boast is the direct result of the enormous influx of people to that new land. Within the comparatively brief period of four or five generations, the United States has grown from a sparsely settled pioneer country into one of the most populous, highly organized and wealthiest nations in the world. It no longer offers great inducements to the poor man and his family in Europe who is forced by stress of circumstances at home to seek a new land.

This fact was fairly generally recognized some years before the Great War, and in the ten or fifteen years prior to the war the stream of European emigration was increasingly being diverted to the unsettled land areas of Canada. The population of Western Canada increased by leaps and bounds, millions of acres of homestead lands were taken up, great colonization companies actively engaged in directing tens of thousands of settlers to this country, villages grew into towns, and towns into cities almost overnight, production increased amazingly, thousands of miles of railway were built, and the whole industrial life of the Dominion largely developed and made prosperous.

The outbreak of the Great War put an abrupt and complete stop to all European emigration, while the exhaustion of free homestead lands and the final disposal of those large blocks of lands controlled by colonization companies operated to shut off immigration of agricultural settlers from the United States. Since 1914, therefore, Canadian immigration has been at low ebb, notwithstanding the great need of this Dominion in the matter of population to develop its great wealth of virgin natural resources.

Since the Armistice there has been a steadily growing opinion that Canada must make up and endeavor to revive the stream of immigration which was bringing life and prosperity to this country before the war. At the same time it was realized that after-the-war problems calling for solution made it imperative that such immigrants as were admitted to Canada must be of a type which would help the Dominion and add to the problems with which the country was confronted.

The situation now is that the population of Great Britain is growing more rapidly than can be provided with means of livelihood there. Emigration on a large scale must take place. On the other hand, the vacant spaces of the world where white people can live and prosper are largely to be found in the British Dominions of Canada, Australia, New Zealand and South Africa. It is agreed that it is the part of Empire statecraft to scientifically direct the emigrating Englishman or Scotchman to these outlying parts of the Empire, thus keeping him under his own flag, and at the same time adding to the economic strength of the Motherland and the Dominions.

Therefore, the British Government has created what is known as the Overseas Settlement Board and placed at its disposal some hundreds of millions of dollars to assist settlement of people from the British Isles in the Overseas British Dominions. Each of the Dominions was invited to develop its own plan of immigration and land settlement and work in cooperation with the Overseas Settlement Board in London, to the end that the maximum number of sturdy British settlers may be settled in the Dominions under conditions guaranteeing the prospects of making a success in life.

Some time ago Australia announced their scheme, and for some months past the stream of British emigration has been largely directed to our sister Dominion. In the meantime, and for some months past, the Dominion Government has been studying the whole problem of immigration in its relation to Canada's needs and its best interests. A special committee of the Federal cabinet has been in consultation with the several Provincial Governments, railways, and companies and individuals vitally interested in, and informed in regard to, the subject of immigration and land settlement.

The result of this intensive and expert study of the problem is found in the announcement made this month by Hon. Charles Stewart, Minister of Immigration and Colonization, of the immigration policy of the Government, and to which immediate effect is to be given.

Inasmuch as the carrying out of a successful immigration and land settlement policy is of the utmost importance to every Canadian, and practically so to every resident of Western Canada, and furthermore as the assistance of every individual citizen is of prime importance in order to achieve the best results, some attention to the plan evolved will be given in a subsequent article.

Passenger Men to Gather in West

Important Meeting of Passenger Agents in Canadian Pacific Rockies

One of the most important of the many conventions being held in Canada this year will be that of the American Association of Travelling Passenger Agents which will take place in the Canadian Pacific Rockies this month. American interest in this country has been growing by leaps and bounds since the war and this is being shown by the steadily increasing number of Americans who are visiting this country. In the Canadian Pacific Rockies and in the unequalled summer resorts of Ontario, Quebec and the Maritime Provinces are found endless attractions for visitors from the United States, and some of the conventions that have come across the line have been of tremendous importance in that they have enabled thousands of America's business leaders to become acquainted with this country and have thus greatly encouraged the development of trade mutually profitable to Canada and their native land.

The holding of the annual convention of the passenger agents in Canada this year is a matter of far-reaching importance to this country, and particularly so to those places which will be visited during the tour of the country, that takes place in connection with the convention. These agents are all the time in touch with travellers, and they are in a position to divert much traffic along lines that they believe to be desirable. Thus it is important that they should be well acquainted with Canada's larger cities, its points of scenic interest and the opportunities which the country affords.

The Association is made up of passenger representatives of railway and steamship lines on the North American continent and has as honorary members many passenger traffic managers and general passenger agents.

At the convention held at Salt Lake City in September, 1921, an invitation was extended by the Canadian Pacific Railway for the Association to hold their 1922 convention along the lines of the Canadian Pacific. This invitation was enthusiastically and unambiguously accepted and from the interest being shown by the members there is no doubt of a record breaking attendance this year.

Corns are painful growths. Holloway's Corn Remover will remove them.

Britain's Faith in Big Ships

Great Britain's faith in the capital ship is unshaken. In the House of Commons, Colonel Charles Amery, Financial Secretary to the Admiralty, declared that, so far as the British Admiralty was aware, there was not in the Royal Navy nor in the navy of any other country, an airplane capable of sinking one of England's dreadnoughts by either bomb or torpedo.

German Sea Trade

Statistics of Port of Hamburg Show Great Revival

The extent of the revival in German sea trade is reflected in the statistics of the Port of Hamburg. In May of 1913, a banner year, 1,143 vessels, totalling 1,543,000 net registered tons, arrived at Hamburg. The arrivals of May, 1922, were 1,242 vessels, totalling 1,195,000 net registered tons. In May, 1913, the departures from the port showed 1,469 vessels, totalling 1,325,000 net registered tons. In May, 1922, 1,363 vessels, totalling 1,254,000 tons, departed.

Rural Route No. 1, Macoucher, Que. The Minard's Liniment People. Sure—I feel that I should be doing a wrong if I neglected to write you. I have had four others growing on my head for years. I had them cut off by a surgeon about fifteen years ago, but they grew again till about three months ago I had one as large and shaped like a lady's dimple on the very place where my hair should be parted, and it was getting so embarrassing in public that it was a constant worry to me. About three months ago I got a bottle of your liniment for another purpose and saw on the label good for tumors. Well I tried it and kept it for exactly two months, with the result that it has entirely removed all trace of the tumor, and were it not that they had been cut fifteen years ago, no mark would be seen. I have not been asked for this testimonial and you can use it as you see fit.

(Signed) FRED C. ROBINSON. P.S.—I am a farmer and intend using Minard's Liniment on a mare for a strained tendon, and am hoping for some relief.

FRED C. R.
It pays to patronize home industry. Buy from the merchants in your own town.

Cocaine Cultivated in Java
Cocaine first obtained recognition as a valuable medicinal drug about thirty-five years ago, and the commercial supply was derived from leaves of the wild coca plant native to Peru. Now, however, the shrub is cultivated on an extensive scale in Java, which will export this year about 4,500,000 pounds of the leaves.

CHILDHOOD AILMENTS

The ailments of childhood—constipation, indigestion, colic, colds, etc.—can be quickly banished through the use of Baby's Own Tablets. They are a mild but thorough laxative which instantly regulate the bowels and sweeten the stomach. They are guaranteed to contain no harmful drugs and can be given to the youngest baby with perfect safety. Concerning them Mrs. Alcide Lepage, Ste. Beatrix, Que., writes:—"Baby's Own Tablets were of great help to my baby. They regulated her bowels and stomach, and made her plump and well." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

No Traveller

First Yoke!—They say that professional chap what lives atop of the hill has written a book about Mars. Second ditto.—Mars? Wo! he's, know about Mars? Why, to my knowledge he ain't been out of this town for five years.

Never Mind What Granny Did—Remember—You're You!

MANY people refuse to believe that tea or coffee can possibly harm them, because they have used these table beverages ever since they outgrew the health rules relating to children.

"Nonsense!" they say, "Why, Granny has been drinking tea or coffee all her life."

It's true that some folks drink tea and coffee without apparent harm. These are the exceptions. But to most people there comes a day of reckoning.

If you are free from headaches, nervousness and indigestion, if you never lie awake at night, if you know that your health is unimpaired—then, perhaps, you are an exception, too.

BUT—it's well to know that, when you do find something the matter with your nerves and digestion, there's a happy, healthful, table beverage made from roasted wheat. Its name is Instant Postum. It has a fragrant aroma and a rich, full-bodied flavor that charm and satisfy without risk to your health and comfort.

Sold by grocers everywhere

Instant Postum FOR HEALTH

Mystery Is Solved

Chinese Laundry Ticket Is Nothing But a Number

The Chinese laundry ticket is a simple thing which one understands the system. According to the very polite boss of some sixteen younger and hunkier Chinese, a business man who has practically retired from heavy labor and now gets a little exercise on lady's waist and dresses which he likes to iron, the Oriental ideograph which is torn in two is no description of the person who has left laundry or any other interesting thing. He says that in his establishment nothing but a number is written in Chinese.—New York Sun.

Keep Minard's Liniment in the house

The Milk Cow As A Sure Money Maker On The Western Farm

After several years of decreasing crop yields, culminating in the crop failure of 1919, which put many farmers in a hole at the time of high prices, a hole from which no bounteous harvests with their accompanying low prices have failed to lift us. It is time we began to realize that we have to look for an income from some other source than straight grain crops.

The first purpose of the farm should be to afford a good living for the farmer and his family. The milking of cows, raising of hogs, sheep or poultry, also the home garden, are all means to this end. All these, or any one of them, with only ordinary care will also considerably enlarge a farmer's income and help to increase his capacity for permanent improvement. Anyway, we must have a side-line, and I believe the most successful one is the milk cow. For the milk cow will provide a steady income when other sources of revenue fail. A considerable number of farmers are now milking a few cows and shipping cream, and by this means have made themselves practically independent of grain crops, that is, so far as their living and other household expenses are concerned.

I myself, after several diminishing crop yields, added to my number of milk cows, and as it was these that kept me going after the total crop failure of 1919 the following extracts taken from my records may be of interest. I already had six cows, but managed to raise my herd to fourteen just ordinary milk cows, and I also purchased a really good Holstein bull. With nothing coming in except from the cows I was naturally anxious as to what the results would be so I kept careful records. Upon going through my records for the years 1920 and 1921 I find that my cows brought me in the sum of \$1,370.06 during the two years. The income from my herd for cream during 1920 was \$1,085.75; for cream and young stock sold during 1921, \$288.31, an average of \$90 and \$75 per month respectively the year round, although I was milking for 8 months only. This year I am milking the same number of cows and my figures for June are \$101.91 and for July \$105.01. My first month for cream in 1920 was July, when the sum of \$168.45 was received. The best month in 1921 was August, receipts then totalling \$102.84. Of course there was a considerable drop in prices for 1921, the average price I received in 1920 was 55c and in 1921 30c. My cows, as already stated, are just farm cows. They cost nothing but labor and the price of a little salt now and again, so the returns are all income to the farmer.

Many will tell you that milking cows is hard work and that the job is too steady. I grant all this; but isn't there plenty of hard work in the field, hard work too, that is not so sure to bring in a dollar? However, cream producing has its responsibilities and needs scrupulous cleanliness and care; for we should always remember that the quality of the raw material, namely, the cream, is the chief determining factor in the quality of the butter. Without clean, fresh, and good-flavored cream no equipment or skill on the buttermaker's part can produce the high standard required on the best butter markets.

To get high quality in cream one must milk clean in clean vessels, and the separating must be done while the milk is still fresh and warm. Cream should be cooled immediately to 50 degrees or less, and not added to bulk until thoroughly cool. All who milk cows should have a supply of ice. This is our one sure crop, has never failed and can be put up—or should I say put down—very cheaply and easily. Not only is it essential for the production of good, sweet cream, but it is a means of supplying the household with ice cream whenever one cares to have it during the summer, which in itself is worth all the trouble. My own ice supply is by means of an ice well, which, outside my label, costs exactly \$10. This is a hole in the ground 7 ft. x 7 ft. x 7 ft. cribbed, and covered with removable cover. It is filled with ice, the blocks being fitted as close as possible and all cracks filled with chopped ice. No packing

whatever is used and the cover when replaced is high enough to allow of getting in on the ice, for which purpose I have a passage entrance from the north side. The roof and passageway are covered with a mattress stuffed with straw, which is easily moved or rolled back to get ice. The place is well ventilated, and I have had no difficulty in getting special grade for my cream in spite of some delay in shipping it from here to the Lloydminster Creamery.

Owing to lack of a really good cow barn I have to let my cows dry off in January and freshen in April, but when I have better facilities I should prefer to have part of them come in during December or dry feed. Then I should be able to have them producing when prices are at their best and they would also keep in good condition when getting on the grass in the summer. At present my cows get nothing but good prairie hay, oat sheaves and a liberal supply of roots. My root crop for the past few years has averaged over 30 tons to the acre. We could get better returns if we had some green crop to eat down during September and October, when the grass is usually dry and pasture poor, and we are planning to do this. Then there is our matter of manure. What are the majority of our farmers doing? How many are putting back to the soil any of the fertility they are taking out? The fertility of our soil is our only natural resource that can be utilized with practically no exhaustion. Lumber resources, which nature has spent hundreds of years in building, are used up in a short time. When the miner has taken out coal, nothing but a hole is left in the ground. By most of them, one can continue to get good crops without exhausting the soil, for by putting the manure back on the land the fertility and physical condition of the soil are maintained, while at the same time the very serious matter of soil drying is being combated. No, there is no denying the fact that we have to get down to some system of mixed farming; for the man who can make a living out of the soil and still maintain its fertility unimpaired is one of the greatest assets any nation can have.—A. Elson, Marshall, Sask., in Farm News Letter.

May Have to Ask England for Help

Irish People Beginning to Think Soil Government Failure

The loss by the Irish Free State within no short a time of its two great lords will revive in some minds Lord Rosebery's melancholy words of a "malignant fate" that continually pursue Ireland. In the death of Arthur Griffith the Provisional Government lost its brain, and the assassination of Michael Collins has deprived it of its sword. The shock and horror of this latter crime are said to have filled the minds of many people in Ireland with fearful forebodings. They are said to be asking each other apprehensively if it may not be true that a curse rests upon Ireland, if all her efforts to govern herself are not doomed to failure, and if it may not be necessary to call back the English to restore order and to bring to justice the marauding and murderous bands that are now making the island a scene of terror.—New York Times.

Destroying Money

Hundred Thousand Dollars Destroyed Every Day at Dominion Treasury

Piles of money, millions of dollars, or what was once money, may be seen these days in the courtyard of the Dominion Treasury. This present accumulation is ten feet square, a bulky pile of greasy lye, reduced to pulp, and ready for the mill. Money to the extent of a hundred thousand dollars or more is destroyed every day at the department. It consists of old bills, dirty or torn, or marked up, which are returned to the Receiver-General, and, after cancellation, exchanged for clean new bills.

No amount of good advice ever made a bad egg fresh.

A Novel Waterway

Huge Canal Will Have to Pass Under Geneva

A huge canal connecting Rotterdam with Basle via the Swiss lakes of Geneva and Neuchâtel is under consideration, and if the project is carried through it will be the most wonderful waterway in the world.

Part of the canal, which joins the Rhine at Fribourg, is already under construction, and will shortly be ready for navigation. Whether the whole waterway, running across Europe, will be completed depends to a large extent upon whether the fifteen million pounds required to construct it can be found.

The greatest difficulty is the section of the canal which must pass through Geneva—or rather under it, for it is suggested to bore a huge subterranean tunnel, right underneath the town, large enough for cargo vessels of 700 tons to pass through.

Ships would then literally sail on "the waters under the earth," and after having emerged from the subterranean canal they would have need to pass through a series of thirty locks between Geneva and Neuchâtel, during which they would be raised to a height of 300 feet above the lake of Geneva. After passing Neuchâtel they would join the nearly-completed waterway along the Aar and enter the Rhine.

The full scheme is at present under the consideration of the Swiss Association for Inland Navigation, and great interest is felt in such a novel waterway.

Clear Case

A swaggy, well-dressed man marched up a ticket office in a station, and, to the surprise of the clerk, asked for a "seaman's return."

"We only issue them to seamen," the clerk pointed out, politely.

The applicant looked at him in anger.

"Why, you leather-clad, swivel-eyed son of a sea cook, if you can't get my starboard boom running foul of your headlights, you'll haul in your jaw tackle a bit, and then—"

"Give him a ticket, quick," shrieked an inspector standing near. "He's one right enough."—Judge.

The Butterfly Race.

WHEN the Butterflies that Pimble had brought to the End-of-the-Earth heard that the reason they were there was that they might have a race, and when Stella announced that there would be a prize of one large drop of honey felt even she so exalted and their gayly tinted wings fluttered so much that they could hardly remain on the ground where they had been told to get in line.

One by one they flew up to the stadium where they were supposed to stay on and were put back in place by the impatient Brownies. A Butterfly (it was the yellow one) was so roughly handled by Pimble that there was a large bare spot on the yellow, powdery covering had been rubbed away. Pimble felt terribly about it and explained that he had not meant to be so rough and that it had been an accident, but the poor little yellow Butterfly felt even worse than she did about it. Its tiny black eyes really looked as though Butterfly tears were not far until Stella took her magic wand and waved it three times over it. Even before she was through waving, the wing was once more as well as it had been before the accident. Both the Butterfly and Pimble were delighted and immediately everyone again went on with the preparations for the race.

"Let's bet on the race!" cried Pimble, excitedly waving a red flower. "You bet first, Stella!"

"Very well," she answered with a smile, for the little Fairy was enjoying the fun just as much as the Brownies. "I bet that the yellow Butterfly wins and that the blue one comes in second."

Naturally these two were immediately proud to have been chosen by the Fairy herself. They were quite set up about it. "I bet on the orange!" cried Snookums, dancing up and down with glee. "And the gray for second place."

"And I'll bet on the white for first and the black for second!" This was from Pimble.

"I have a feeling that the black Butterfly will win!" exclaimed Kinkajou. "So I choose it for first place and the blue color for second place." "How about you, Lorykins? What's your bet?" "I don't know why," Lorykins said slowly, "but I just sort of know that the pale green Butterfly is going to win, and—let's see—I'll bet that the orange one comes in second."

"Well," laughed the Fairy, "now you've all placed our bets, let's begin. Pimble, you stand over there and hold up the red flower in your hand. Hold it high when I say 'Go!' drop it instantly. Now! Out! Out! Out! Away flew the Butterflies!"

The Brownies were beside themselves with excitement. They were all yelling and jumping up and down. Pimble went wild for a few moments because the yellow Butterfly was away ahead. It looked as though he had picked the winner. Then the black one suddenly came in and passed the white one (Stella's Butterfly) passed the black, and the Brownies yelled louder and louder. Even Lorykins forgot to be lazy and jumped around as much as the others, and he had good reason, for a sudden his green Butterfly caught up and then passed all the others and—won!

The gray came in second. "You bet that the black one would win!" laughed Pimble, "that's the only kind of a race you could ever win! One that someone else ran, or rather, for you. Lorykins wins first with the green and Snookums wins on the gray for second place. Goodness! This is fun!"

The green Butterfly received its prize of a drop of honey and unhesitatingly shared it with the others.

Possibilities of Canada From The Viewpoint Of An American Financier

Trade between Canada and the United States is vital to the prosperity of both countries. F. R. Russell, Vice-President of the National Bank of Commerce in New York believes. Next to the United Kingdom, Canada is the foremost foreign buyer in the markets of the United States, while imports into the United States from Canada are not exceeded in value by imports from any other country except in occasional years from Cuba.

By the accepted tests of greatest, Canada now ranks as one of the foremost nations of the world. Mr. Russell says in the September number of the Bank's magazine, Commerce Monthly. "It is immensely rich in natural resources. Its Government is stable, its population is thrifty and energetic, and its business leadership has been proved to be of the imaginative type requisite for the organization of modern industry. The banking and currency system is among the best and transportation facilities, both within the country and with other countries, are equalled in adequacy only by those of the United States."

"Four-fifths of all the foreign trade of Canada is carried on with the United Kingdom and the United States. Considerably more than half the total imports into Canada have long come from the United States, the proportion being slightly in excess of two-thirds in the twelve-month period ending June 30, 1921."

"A clear realization of the character of the national consciousness of Canada is the first step toward an understanding of the international position and relationships of the country. Whatever the technical term which may be applied to the political status of Canada, in effect it is a proud and vigorous nation, sure of its future, rejoicing in its share in the leadership of the world, and also rejoicing in its place as an integral part of the British Empire."

"Canada is in that stage of economic development when population is small in relation to natural resources, and when exports of raw materials must pay for imports of capital to develop them. Insofar as Canada is a producer of raw materials which the United States does not produce in quantities sufficient for domestic consumption, this country is a heavy buyer in the Canadian market. With few notable exceptions, however, the United States is a heavy exporter of exactly those classes of raw materials and food products which make up the bulk of Canadian export trade."

"Despite the growth of manufacture, economically speaking, Canada is a new country and the domestic industries are not able to meet its rapidly expanding requirements for manufactured goods which to constitute a large proportion of Canadian imports. At the same time, Canadian manufacturers have already proved themselves able to market successfully a wide range of products in overseas markets. This situation results primarily from the fact that the main industrial areas are Southwestern Quebec and Southwestern Ontario, and manufacturers there are more advantageously placed in relation to the markets of Canada than they are in relation to many sections of the Canadian market, which can buy better in the United States; the character of demand being practically identical in the two countries."

"Today Canada is probably the most favorable field in the world for investment, comparable only with the United States, in the era of its most rapid physical development from the close of the Civil War to the opening of the present century. Although, as is the case in all new countries, capital must be sought beyond its borders, the capital accumulation of Canada is very great. A Canadian financial journal states that from 1915 to 1920 more than \$2,512,000,000 of Dominion provincial, municipal and corporate securities were sold in Canada."

"Capital not supplied by Canadians has been secured chiefly from Great Britain and the United Kingdom and the United States. From 1915 to 1921 Canadian Governmental and corporate securities amounting to \$1,194,000,000 were floated in the United States. In addition to industrial securities, and Government bonds, some United States capital is invested in industrial undertakings not represented by securities issues, and it seems probable that the net total of United States investments in Canada must now be as much as \$1,500,000,000."

"Both Canada and the United States possess the incomparable advantage of having developed in the period of modern transportation with the result that national boundaries have been extended the width of a continent. This is one of the secrets of their greatness, and is the basis of the outlook of their business men."

"The two countries have identical standards of living and methods of production, and there is no material difference between their distances to the main markets. Except as affected by climate, there is no marked difference in the character of the natural resources of the two countries, or their products. In a general sense, their development has been, and will continue to be along parallel lines and in overseas markets they are rivals. Insofar as there is a trade between the two countries in products of a non-competitive character, proximity makes each the cheapest source of supply for the other. A large part of the trade between them has its origin in the same factors as those which cause goods to move freely across the boundaries of contiguous states of the United States and provinces of Canada."

Economy of Dairy Products as Food

There is one especial virtue in the many recipes given in the series Why and How to Use Milk and Its Products pamphlets issued by the Dominion Department of Agriculture, and that is, that the large majority call for no fire or coal-burning. The few that do require a warm or boiling water, necessitate the use of nothing more serious or costly than a little oil, gas, or electricity by way of heating. This is remarkable evidence of the economy of dairy products as food.

NEW LAMP BURNS
94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 33 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 34 per cent. air and 6 per cent. common kerosene (fuel-oil).

The inventor, T. V. Johnson, 579 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

MY
CANADA

—BY—
KILNOR BARNES ELIOT
Published by Special Arrangement
with the Author

(Continued)

When I awoke this morning my annoyance seemed childish in the extreme, so I went down to breakfast determined to act as if I would rather be made fun of than not. I half expected to see Lee in a dress-suit—but Mr. Livingstone is not so crude in his methods as to do the thing that is expected of him.

The disturbance of my peace was on his best behavior, and I immediately jumped to the conclusion that he, too, had decided to turn over a new leaf. At the breakfast table he devoted himself to Sunny. I like to watch him when he is with her; he has the uncommon gift of being able to talk to children without talking down to them, and Sunny adores him.

So when he asked me, as we rose from the table, if I would go for a ride with him, I accepted most graciously and hurried upstairs to get into the disapproved riding habit.

Sunny came up with me, and it was lucky that she did so, for I wasted ten minutes looking for one of my boots, and was just on the point of borrowing Mrs. Bingham's when Sunny had an inspiration.

"Why, Auntie Eliot, I remember—Me and Thomas were playing puss-in-boots yesterday, and I just took one of your boots 'cause Mother's weren't high enough—Thomas fell right out of them."

"Where is the boot now?" I asked as calmly as I could.

Indoor Life

Spending more time indoors makes women far more subject to constipation than men.

The liver becomes sluggish and torpid, the bowels constipated and the system poisoned by impurities.

If you would get away from the myriads of ills which result from constipation, it is only necessary to use Dr. Chase's Kidney-Liver Pills.

The benefits from their use are as lasting as their effects are prompt and certain.

Mrs. John Barry, 18 St. Annable Street, Quebec, writes:

"This is to certify that I was troubled for years with constipation and tried all kinds of medicines without relief. At last my husband suggested that I try Dr. Chase's Kidney-Liver Pills. I did so, and must say that they have given me more relief than all the medicine I have taken during the last fifteen years. I may also add that I have used Dr. Chase's Ointment for piles with excellent results."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25¢ a box, all dealers or Edmondson, Bates & Co., Ltd., Toronto.

W. N. U. 1428.

"I'll go and see," announced the culprit, not in the least disconcerted, and in a minute she returned with the missing boot.

"It was in Uncle Don's room under a chair," she explained confidentially. "Thomas rushed away from me and went in there, and I rushed in after him and I must have dropped your shoe."

Comment seemed useless.

Following this, everything I touched seemed to go wrong. The door on my skirt all seemed to be missing, and I ran a pin into my finger and put bloodstains on the dressing-coverer. So when I finally went downstairs Mr. Livingstone was waiting at the door with the horses.

"You'd better hurry up," cautioned Sunny. "Uncle Don doesn't like to wait." I said that a lady never keeps a gentleman waiting.

All former injuries were forgotten when I saw Mr. Livingstone. Proud and head to head he was clad in irreproachable evening-dress! And of course every man on the place "just happened" to be close enough to see us.

My first impulse was to go back to my room and take off my riding clothes, but instantly I realized that this was exactly the course that Mr. Livingstone would expect me to follow, so—not very gracefully, I fear, for I did not wait for his assistance—I pulled myself into the saddle and gave Cupid his head.

I was around the base of a hill and I said to the house before Mr. Livingstone caught up with me. I glanced out of the corner of my eye at him and was surprised to see that he did not seem to be enjoying the joke as much as he had anticipated—indeed he seemed to be a trifle greyed and gloomy and one pair of patent leather pumps were on a fair way to destruction.

You may be sure I let him speak first. "Say, Miss Eliot," he said, not so very humbly, "I hope I haven't offended you. I only meant this in fun, you know."

"Of course I am not offended," I said as sarcastically as I could; "I enjoy nothing more than to be made fun of. The stock of the ranch is a must say that you Canadians have a peculiar sense of humour—one which I am sure will be appreciated."

"We'll leave Canadians in general out of this, if you please," he interrupted hotly. "I did not intend to make you the laughing-stock of the ranch, and when I try to apologize you must at least pretend to believe that I am sincere in what I say."

What about all the men who were staring around? I asked. "I suppose they are fairly decent people," he answered. "And in all probability they are enjoying the clever way in which you turned the joke on me. I assure I look absolutely idiotic in these goggles—I wish Mother had picked the outfit out of me when I was a child."

But my injured dignity was not to be appeased so easily, and we rode "tuff" all an hour without speaking again. Then we turned to come home, and as we neared the house Mr. Livingstone said, in a dangerously smooth voice, "You will not accept my apology, then?"

"No," I replied, against my better judgment.

"Very well," he blazed. (He has a temper, evidently. "I also certainly will not trouble you with it again!")

And that is how matters stand. I do not suppose he will make me to ride with him until I make the first move, and I have vowed a solemn vow to be even with him if I endeavour fills the rest of my days.

XVII.

Bar B Ranch,

August 24th, 19—

The past ten days have been very quiet and uneventful, but on Monday Mrs. Bingham and Sunny and I are going to Carbon City to do some shopping. Perhaps something worth while recording will happen there.

Mr. Livingstone and I are still at daggers drawn. We are painfully polite when we have to speak to each other, but that is not very often, for he is much busier than he was formerly. I scarcely see him except during meals, and on some days not even then. He has not so much as mentioned riding since the day of our quarrel—neither have I, and I am determined that he shall speak first, even if I were partly in the wrong. It does not hurt a man of his type to discipline him occasionally.

Mrs. Bingham and I ride nearly every day, so I have not been without exercise. Mr. Paget joined us one day last week. His riding-clothes are quite as correct in cut as the dress-suit which so aroused Mr. Bingham's ire. But why will men wear brown, men of his type especially? It always seems to me that a brown suit throws into high relief all there is in a man of "the world, the flesh, and the devil." I would rather see Mr. Paget at the piano than on horseback. I wonder when he looks after his business? In the intervals between changing his clothes, I suppose.

I have just had a very amusing letter from Mother, in reply to the one I wrote to her before leaving Winnipeg. Poor dear Mother, she is so anxious about her duck chicken! She advises me to buy a small revolver—and she has a distinctly feminine horror of firearms—learn to use it, and carry it with me night and day. The general impression she has gained from my letter seems to be that Southern Alberta is inhabited wholly by "bad men" and wild, very wild, Indians (perhaps I should not have

IS YOUR NOSE PLUGGED?
HAVE YOU CATARRH?

If Subject to Colds, Here is Real Good Advice

Don't load your stomach with cough syrup. Send healing medication through the nostrils—send it into the passages that are subject to colds and Catarrh. Try to do this with CATARRHOZINE, which helps a cold in ten minutes. Even to the lungs goes the healing vapor of Catarrh—through the bronchial tubes, nostrils and air passages—everywhere a trace of disease remains will Catarrh follow. You'll not have colds, nor will you suffer from sniffles, bronchitis, or other trouble if Catarrh is used. Get it today! But beware of dangerous substitutes meant to deceive you for genuine Catarrh. Large size, two months treatment, costs \$1.00, small size 50c, sample size 25c, all dealers or the Catarrh Co., Montreal.

mentioned the Reserve), and she wonders that a person of Mrs. Bingham's evident refinement can content herself in such a place. I think my first letter from the ranch would reassure you about it. I am sure that my description of Mr. Paget would.

Mother also tells me that in the same mail your "amazing" letter was sent to Father from Mr. Hartford, and that Father is highly gratified by the renewal of their acquaintance. And her letter ends with a lengthy explanation of the way in which Mr. Hartford is connected with several "very good families."

Sentenced to Death.
No Appeal Possible

The death warrant is passed out today for a Corn Extractor. It means the end of the corn. Putnam's lifts out corn, root and branch, and never fails. Refuse any substitute for Putnam's. 25c everywhere.

The shipbuilding firm which constructed the one time largest steamship, the Great Eastern, was founded in the year 1812, and is still in existence.

Dye Stockings
Or Sweater In
Diamond Dyes

"Diamond Dyes" adds years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, etc. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or shapies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade, or ruin. Tell your dyer whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

From the thirteenth century the Poles became the most warlike people in Europe.

Sores Flee Before It—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eucalypti Oil. All similar troubles should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

Some day the world may learn with astonishment that the solution of its problems is contained in the writings of four obscure men—Matthew, Mark, Luke and John.

25 for 35 cents

Giant Airplane Engines

British Government Has Ordered Six Of 1,000 Horsepower

A big development in the use of airplanes is predicted as a result of the giant engines which are being ordered by the British Government. These engines, six of which have been ordered, are of 1,000 horsepower and capable of 1,800 revolutions a minute.

The statement is made that the new airplanes will have a range of 2,500 to 3,000 miles, but the Air Ministry explains the range depends in great measure on the type of machine to which the engine is fitted and on the purpose for which the machine is intended. The new engine was designed and built by the Messrs. Napier and was the outcome of several years' experiment and research. It has sixteen cylinders and has run satisfactorily for thirty consecutive hours on a bench. Its weight is about three pounds per horsepower.

Colic, Cramps,
Stomach Pains,
Need a Quick Relief

Security against these sudden ills consists in always keeping handy a bottle or two of Nerviline. No family should ever go to bed unless Nerviline is in the house. It fulfills so perfectly every service as a pain remedy that once used, you'll never again be without it. Money can't buy much greater assurance against the many small ills that constantly arise in every family than you get in a 35c bottle of Nerviline. Sold everywhere.

Timber Lost Through Fires

No Railway Can Long Withstand the Loss of Forests

"Every forest fire that broke out within fifty miles of the Canadian National lines this summer stole away some of the immediate or potential wealth and delayed to that degree the financial buoyancy of the public-owned system," stated C. Price Green, Chief Commissioner of Industries and Resources of the Canadian National Railways in an interview.

"A large mileage of the Canadian National runs through natural timber growing lands which can never produce any other marketable crop than timber. At the same time, these wooded regions are generators of tourist traffic and account for the rapidly expanding number of visitors from the United States travelling on our lines, as well as for the great volume of recreational travel on the part of Canadians. The security of the forests, therefore is absolutely vital to the sovereignty of any railway system in this Dominion."

"The destruction of forests by fire this year was not the work of the railways, as Government reports will prove, but of fishermen, campers, settlers and woodmen travelling generally. It is the careless citizen, himself a shareholder in the Canadian National, who can wreck or maintain these forest resources so essential to our national prosperity and the successful operation of the public-owned railway system."

Minard's Uniment used by Physicians

Pneumonia Treated by Wireless Although suffering from pneumonia in another shop 600 miles away, a patient was successfully treated by wireless for four days by Dr. William Irwin, of the American liner President Harding.

THE EXPLANATION
Nature placed the growth-promoting "vitamins" in the oil of the cod-fish—this explains why

Scott's Emulsion is so definite in its help to a child of any age. Latter-day science reveals that the "vitamins" are needed for normal growth. **Scott's Emulsion will help any child grow.**

Securing a Patent in Canada

Useful Advice Is Given For Benefit of Intending Applicants

Applications for patents in Canada should be addressed to the Commissioner of Patents, Ottawa, Ont. The term for duration of a patent is limited to eighteen years. The fee for a patent for the full term of eighteen years is thirty-five dollars, of which fifteen dollars is payable on filing the application and twenty dollars on the grant of the patent. Any intending applicant for a patent who has not yet finished his invention, and is in fear of being depolled of his idea, may file in the Patent Office a description of his invention so far, with or without plans, when the Commissioner, on payment of a fee of \$5, causes the document, which is called a caveat, to be preserved in secrecy; but the secrecy of the document ceases when the applicant obtains a patent for his invention.

"DR. FOWLER'S"
Saved The Lives Of
Four Children

Diarhoea, dysentery, cholera, infantum and summer complaint are responsible for more deaths, especially among children, during the summer months than any other form of disease. According to statistics, in the City of Toronto alone, in the past five years out of 1,008 deaths of children, from diarrhoea, 767 died during the four summer months. It therefore behooves every mother to look after her children on the first sign of any looseness of the bowels by using Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 77 years, and has been proven to be the best there is.

Mrs. Harold Sellers, Pennfield, N.B., writes: "Dr. Fowler's Extract of Wild Strawberry saved the lives of four of my children when all other remedies failed. It stopped the vomiting and terrible diarrhoea with which they were troubled. I will always recommend it, and now always have a bottle on hand in case of emergency."

Price 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Germany's Printing Presses

People have been looking unnecessarily far afield for an explanation of the rapid slump of the German mark. This fall was due in part to the fact that notes to the value of \$700,000,000 were put in circulation in a single week, and in part to the fear that still more would be printed in the immediate future. Compared with these factors, the political factors are almost negligible—London Sunday Pictorial.

"PICTURE OF A MOVIE STAR IN EVERY PACKAGE"

No Immediate Action Will Be Taken By Disarmament Committee

Geneva.—A race between France and Great Britain to prove which of their methods to obtain a reduction in armaments will yield the most results is in prospect in consequence of a decision of the disarmament committee of the assembly. The committee incorporated the suggestions of both M. de Jouvenel, of France, and Lord Robert Cecil, of England, into a resolution which will be transmitted to the assembly.

The League of Nations treaty between the United States and Canada was again cited before the committee by H. A. L. Fisher, representing Great Britain, as an example of what a regional agreement ought to be. This document of a hundred years ago, he said, might well be taken as a model, as well as proof of what such an understanding may accomplish. Mr. Fisher's arguments and those of other supporters of regional agreements prevailed.

The resolution to be submitted to the assembly charged the temporary mixed committee on disarmament with the task of making a further study of the question, and requested it to prepare the text of a treaty for

a regional agreement, as well as other agreements to be submitted to the various governments, which will be asked to give their views on them so that the next assembly may act.

The decision of the committee means that there will be no possible action by this assembly on the plans for the reduction of armaments, but that the work of investigation already begun will continue.

Sustained Right To Transfer Insurance

Beneficiary Can Be Changed If So Stipulated on Policy

Montreal.—The right of an insured person to transfer the benefit of a life insurance policy to some other person other than that originally designated, provided that stipulation has been made on the face of the policy reserving that right, was sustained in a judgment handed down at Three Rivers by Judge Dupuis. The Metropolitan Insurance Company was the defendant in the action which was for \$3,000. The company had paid a claim to Mrs. Maise Charbonneau, who had been named beneficiary of her deceased husband after the original benefit was assigned to J. E. Munier, son-in-law. After the company paid the \$2,000, Munier claimed a like amount in addition.

Dutch Farmers May Come to Canada

Government Scheme to Assist Emigration

Ottawa.—An influx of experienced agriculturists from Holland to Canada is likely, according to Baron J. C. C. Stenberg, who left Ottawa for Toronto after interviewing Hon. Charles Stewart, Minister of the Interior, and other members of the Government. Baron Stenberg was in Ottawa representing the Government of Holland, which proposes a scheme of assisted emigration of farmers and agricultural laborers and their families.

Embargo Delays Canadian Shipments

New York.—Freight shipments from Canada through the western states to the east are being delayed by reason of the embargo on freight, except for foodstuffs and other necessities, by the New York Central, Lackawanna, Lehigh Valley and Erie Railroads. The embargo was placed to facilitate the movement of coal to relieve the threatened shortage resulting from the coal strike.

EVERY WOMAN IN POOR HEALTH

Has an awful struggle. Lots to do all kinds of worry, poor appetite, headaches, weakness. Her own desire is for more strength and better health. What sickly worn out women need is a cleansing, blood purifying remedy. Dr. Hamilton's Pills. This wonderful medicine clears out the system, regulates the bowels, helps the blood. To look your best, to feel fit and fine all day, to be free from lassitude and headache, use Dr. Hamilton's Pills regularly. See at all dealers or The Cathartine Co., Montreal.

Trip Was Successful

Explorer Plans to Return to Arctic Next July

Wiscasset, Maine.—Donald B. MacMillan, explorer, plans to return to the Arctic in July next year, sailing from this port in the Bowdoin. He said that his recent trip had been successful, and that another would be undertaken.

The most important discovery made on his exploration trip to Baffin Land, he added, was that it is a narrow peninsula and not a great land as mapped.

Like a Grip at the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. B. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

Saskatchewan Sells Debentures

Dominion Securities Corporation of Toronto Were Buyers For Syndicate

Regina, Sask.—At a net cost of 5.19 per cent. to the province, the Dominion Securities Corporation, of Toronto, representing a syndicate comprising themselves and Dillon, Read and Company, of New York, purchased \$2,635,000 Saskatchewan twenty-year five per cent. debentures, their price being \$7,652. There were nine tenders. Bidders were asked to quote on four different bases for fifteen and twenty-year debentures bearing interest at 5 and 5½ per cent.

Soldier Author's Gift to Red Cross Toronto.—The Canadian Red Cross Society has received the sum of \$1,538.25 from Col. A. E. Scott, of Quebec City, to be expended on behalf of tubercular soldiers in such way as the Red Cross may deem advisable. The money represents the royalty proceeds of Colonel Scott's book, "The War As I Saw It."

Australia Maintains Universal Service London.—Replying to a deputation representing Labor, Socialist and other organizations, the Australian Minister of Defense, said there was no hope of abolishing the compulsory provisions of the Defense Act, says a Reuter despatch from Melbourne.

U.S. Shopmen Will Sign Separate Agreements With Individual Roads

Might Declare a Moratorium

Saskatchewan Premier Issues Warning to Conference of Creditor Classes

Regina.—A warning that the Government may have to face the question of exercising its power to declare a moratorium in Saskatchewan was uttered by Premier Chas. Dunning. The Government's decision, he said, would be guided by two factors: the continuance or otherwise of the policy of piling up expenses against debtors by the use of court procedure for the enforcement of collections, and the price of wheat.

Mr. Dunning's announcement was made towards the close of an all-day conference of creditor classes called by the Government to consider ways and means of preventing the necessity of farmers throwing their wheat on the market immediately after threshing, thus forcing the price down below the cost of production.

The conference did not crystallize its sentiments with respect to moratorium legislation by the passage of any resolution. With the exception of the banks, practically all the large creditor groups were represented, including the loan companies, implement companies, lumber companies, retail merchants, wholesalers, the rural municipalities in addition to the Saskatchewan Stockgrowers' Association, the Saskatchewan Co-operative Elevator Company, and the Board of Trade. Many of the members of the legislature were also present, as well as members of the Government.

Want Eastern Investors

B.C. Anxious to Prevent Status Gaining Influence Over Commercial Affairs

Revelstoke, B.C.—British Columbia's first welcome to the delegation from the British House of Commons and Montreal Board of Trade which is touring Canada, was presented by Horace Manning, of the Revelstoke Board of Trade.

The delegation, consisting of 127 men, was entertained by officials of the city and district. One of the points urged by Mr. Manning in his address to the visitors was the desire of citizens of British Columbia that investors of Eastern Canada should do their part to prevent those of the United States from gaining ascendancy in influence over commercial affairs in the province.

Would Regulate Export Of Canadian Cattle

Agricultural Council Anxious to Keep Quality Up to Standard

Winnipeg.—Restrictions as to the quality of cattle exported to Great Britain when the embargo is removed, and regulation to approximate the demand at the several seasons of the year, are being sought by the Canadian Council of Agriculture.

The council is appealing to the Dominion Government, through the ministers of agriculture and trade and commerce, in order that the British market may not be flooded with Canadian cattle at inopportune times, and that the quality may be kept up to the standard required by the British buyers.

Hit By Trolley Standard Saskatoon.—While looking backward out of the door of the fast moving street car he was driving, Albert Clemens was struck on the head by a trolley standard. Following a skull operation his recovery is expected.

MURINE FOR YOUR EYES

W. N. U. 1438

Chicago.—The policy committee of the striking railway shop craft have authorized B. M. Jewell, strike leader, to sign a separate peace agreement with individual roads.

This action, it was stated, would end the strike on from 30 to 32 of the 202 class one railways of the country which entered into direct negotiations with Mr. Jewell recently at Baltimore, and on any others who cared to accept the peace terms. The terms of the agreement are those offered at New York with a slight change made necessary to mollify the opposition in the unions' ranks. With these terms as a basis, system federations on roads not now parties to the agreement are authorized to enter peace negotiations with proper railroad officials. Until these employees are returned to work, they will be assisted financially by those who are employed.

Present employees and the strikers will be retained by the railroads signing the Jewell-Willard agreement; the old employees to return to their former positions at the present rates of pay, not later than 30 days after the agreement is signed. All strikers, with the exception of those found guilty of acts of violence, are to be on the railroads' payroll at the end of the 30-day period. Men will be called back to work in the order of their standing.

Two Men Killed In Dust Explosion

Plant of American Hemin Co., Indiana, Was Destroyed

Terre Haute, Ind.—Two men are known to be dead, and damage estimated at \$3,000,000 done as the result of the fire caused by a dust explosion which destroyed the plant of the American Hemin Co. here. Fred Stevens and a man whose identity was not learned, are known to be dead, and it is feared other persons may have been trapped.

Sixty persons were working in the plant when an explosion, followed by the fire, occurred.

Reform Dutch Cabinet

The Hague.—The Dutch Cabinet which resigned July 22, has been reconstituted under the same premiership, that of C. J. M. Ruysde Beerenbroek.

SUCH PAINS AS THIS WOMAN HAD

Two Months Could Not Turn in Bed. Lydia E. Pinkham's Vegetable Compound Finally Restored Health

Seattle, Washington.—"I had dragging pains right and down my back, then I had chills and fever and much pain in my right side and a hard lump there. I could not turn myself in bed and could not sleep. I was this way for over two months, trying everything until one told me, 'un-til my sister brought me a bottle of Lydia E. Pinkham's Vegetable Compound. I took it regularly until all the hard pains had left me and I was able to be up and to do my work again. The hard lump in my side and I feel splendid in all ways. I know of many women it has helped.'—Mrs. G. RICHMOND, 4640 Orcus St., Seattle, Washington.

This is another case where Lydia E. Pinkham's Vegetable Compound brought results after 'trying everything' any one told me 'had failed'.

If you are suffering from pain, nervousness and are always tired, if you are low spirited and good for nothing, take Lydia E. Pinkham's Vegetable Compound. You may not only relieve the present distress, but prevent the development of more serious trouble.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism

Giving the Baby Pleasure.

The following appeared in a recent issue of an old currency newspaper: "If Mr. Smith, who left his wife and baby twenty years ago, will venture to return home, it will give the baby great pleasure to knock his block off."

Just Like Dad's.

Editor—What kind of poetry do you call this? You say "Her eyes were blue as skies, her teeth just like the stars." What kind of teeth could be like the stars?
Th: Brush Poet—Fe's were the kind that come out at night.

Got Some of Mac's.

Stonyite—"Is this nine-
four-07 two-six, Edmonton?
Thanks for that crate of
chickens you sent out, old
man! But, say, you ought
to bawl that dealer out. The
crate was so frail that they
all got out when I was get-
ting them at the station and
I had to scold the neighbor-
hood for 'em. Even then, I
only caught ten!"
City Friend—"Sssh! I
only saw six."

What Shall I Do With the Money?

Many a holder of the Can-
adian Government bonds ma-
turing Dec. 1, 1922, has been
asking this question. The
advertisement of the Minister
of Finance supplies an an-
swer. The investor, by giving
notice to the manager of any
one of the branches of a char-
tered bank, can arrange to
get new bonds bearing the
same rate of interest, the
highest possible security and
a liberal rate of interest.

Game Regulations.

Following are the open seasons
on the game specified—

Deer, Moose, Cariboo—
November 1st to December 14.
Ducks, Geese—
September 1st to December 14.
Grouse (Prairie chicken, Partridge, etc.)
October 15 to November 1.
Muskkrat (North of North Saskatchewau River)—
December 1 to 31.

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

- Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, **GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.**

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds **AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th**, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1st interest cheques as usual. Holders of coupon bonds will detach and retain the last unmaturing coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

MAGIC BAKING POWDER

A Combination of Two Materials and the Result is Chic

Whole System Is Benefited By Tanlac

Thousands of frail, nervous people and convalescents everywhere have testified to the remarkable power of Tanlac in bringing back their health, strength, and working efficiency. It seems to quickly invigorate the constitution and is a powerful foe of weakness. Mrs. John Hatrick, 901 Notre Dame Ave., Winnipeg, Man., says:

"Five years ago I had a nervous breakdown. I couldn't even hold a glass of water without shaking it out. My head ached so I thought it would split and I got so dizzy that several times I fell and hurt myself so bad that scars are on my yet. Six bottles of Tanlac actually made me feel like a different person. All my troubles are now gone."

There is not a single portion of the body that is not benefited by the helpful action of Tanlac. It enables the stomach to turn the food into healthy blood, bone and muscle, purifies the system and helps you back to normal weight. Get a bottle today at any good druggist.

WORLD HAPPENINGS BRIEFLY TOLD

Pope Pius has requested France to protect the lives and interests of the Catholic clergy in Asia Minor, who are threatened.

The British mandate for Palestine was formally proclaimed Sept. 11. Sir Herbert Samuel, the High Commissioner, assumed office and took the oath of allegiance.

The Aerial Survey Company is making preparations for extensive flying operations in Newfoundland during the coming winter and three planes have arrived at Botwood from England.

Discovery near Victoria is reported of a large deposit of volcanic ash of tested, cleansing properties, which, it is claimed, will supersede on the market all the present lye cleaning compounds.

An autographed photo of Marshal Foch, which was one of the most prized possessions of the Aero Club of Canada, has disappeared, and it is thought some selfish souvenir hunter has taken it.

The longest distance that Alberta coal has yet been shipped was when an Edmonton firm recently forwarded a carload of egg coal to Lewis, Que. The freight rate alone for the long journey was \$13.30 per ton.

Had Her Guessing
Mabel—Clara's last photograph was lovely.
Edith—Yes. I had to ask her who it was.

IN THE SHADOW OF POOR HEALTH

In This Condition Relief Comes Through Dr. Williams' Pink Pills

When the shadow of poor health falls upon you; when hope fades and life itself seems scarcely worth living, then is the time you should remember that thousands just as hopeless as you feel, have been restored to the sun of health through the use of Dr. Williams' Pink Pills. The rich red blood which these pills actually make strengthens the whole system. The nerves are strengthened, headaches vanish, the appetite improves, and once again there is joy in life. Among the thousands benefited by the use of this medicine is Mrs. Joe Robinson, Oshawa, who says:—"Some time ago I was in an anemic condition and so weak I would faint away at times. I had no appetite, could not do my housework; in fact life seemed scarcely worth living. I was exceedingly pale and tried doctor's medicine with no good result. Then one day I saw Dr. Williams' Pink Pills recommended for a similar condition and I got a supply. I continued taking the pills until I had used about a dozen boxes, and they have made me a well woman. I can now do a good day's work about the house, have no more fainting spells and can go about more actively than I did before. I believe these pills just the thing for pale, weak girls and women, and it gives a fair trial to do for them what they have done for me."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Prince Has Heavy Mail

Three Secretaries Attend to Letters Delivered to York House

The Prince of Wales normally receives about seven hundred letters a day, though there have been occasions when the contents of the mail delivered to York House in the lay contained well over fifteen hundred letters.

A couple of weeks before the Prince started off his Indian tour, 2,000 letters were delivered to his Royal Highness. The compiler of the Prince's establishment, assisted by three secretaries, attends to the Prince's letters, the compiler bringing under the Prince's notice communications which he thinks require the personal attention of his Royal Highness.—Globe.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Halifax Films

"Halifax Films" has been organized to produce Canadian motion pictures from the works of Canadian writers. The Board of Directors includes the Minister of Public Works and Mines, President of the Board of Trade, Director of the Halifax Herald, President of the Commercial Club, Ernest Shipman and others. The first production will be "Frederick William Wallace's 'Viking Blood.'"

The Oil of the People—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

The Coliseum at Rome held 100,000 spectators, of whom 87,000 were seated.

CATARRAH DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy of the Catarrh. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced, your hearing will be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and enabling Nature to restore normal conditions.

Canadian Bacon in Britain

Canadian Product is Rapidly Gaining Favor in the Old Land

In connection with the controversy regarding the alleged poor quality of Canadian bacon and produce, John Loudon and Company, one of the largest importers of Canadian bacon products in England, made this comment: "Our existence depends on the sale of Canadian bacon, and we can sell every ounce of it that Canada can ship. It is quite true that Denmark is a competitor, but it will never drive Canada from the British market. Our actual imports this year will be greater than last year, we confidently predict, and Canadian bacon is growing in favor from month to month."

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Soviet Reward for Science

Professor Who Discovered Process of Dyeing Receives Bounty

Professor Turkin, of Moscow, who discovered a process of dyeing fabrics, was deemed by the Commissariat of Social Economy deserving of a bounty. He was accordingly granted 80,000,000 rubles.

The professor received at once 2,000,000,000 paper rubles. In lieu of the rest he is offered a villa in the Crimea, to be chosen by himself. So there are for sale in the Crimea small 78,000,000,000 ruble villas—five rooms and all the comforts of home. With his 2,000,000,000 rubles the professor can pay his living expenses for one season.—New York Tribune.

respecting the shipment of cream, the commodity can only be shipped in 5, 8 or 10 gallon cans. Due to legislation passed in February last, all buying stations for cream are banned, and the farmer therefore forced to ship his product direct to the creamery.

It was claimed that the farmer was penalised when forced to use the 5-gallon can when many of them could not assemble that much cream for shipment at a single period. Calculated on a mileage basis the tariff for a 5-gallon can for 25 miles and under, stands at 18c with corresponding differences in the tariff for 8 and 10 gallon cans.

Stony Plain and District

Another car of stock left here on Friday, killed thru to a ranch in Southern Alberta.

Cream is now being shipped from the local Demonstration Farm to the City three times a week.

Work is now in progress on the concrete water tank at the Commerce corner on Main street. This tank will hold 20,000 gallons of water, and is designed for fire protection purposes.

Mr Cartwright, boiler inspector, was in town this week, giving the local steam outfit a lookover.

While a freight train was using the siding next the main line on Sunday afternoon, a rail spread, letting a bunch of cars off the track, giving two section gangs a 20-hour job before the track was cleared.

The local School Fair was held on Tuesday, and was noted for the very large entries, a good display being shown in every department.

Mr and Mrs Kreye, old and respected citizens of Stony Plain district, celebrated their golden wedding, on Tuesday, the 19th. Altho this is the busy season, a goodly number of friends of the worthy couple called to congratulate them and to help at the big celebration.

Mr Thorson is the new Principal at Glory Hills School for the ensuing term, with Miss Finchbeck teaching the Primary room.

A G Schmitt, Entwistle, and C Nyström, Edmonton, were visitors in town over the week-end.

Prairie chicken are said to be very plentiful in the Brightbank district, some of the farmers there complaining of the damage being done by the birds.

The trial of John G. Bosserman for the murder of Davis, near Rocky Rapids, is on the calendar at an Edmonton Court, for October 24.

E. A. Outway has been awarded the contract for painting the interior and exterior of the New Provincial Police Barracks, with garage and stable at Edson. E. A. Outway deserves congratulations.

Town "chickens" are just like those on the farm—if you allow them to run around much, they get tough, says the Cardston Review.

Dr Frith, Dentist, will be at the Royal Hotel on Saturday, Sept. 23.

N. E. Shorten, Chiropractor, of Edmonton, has arranged to be in Stony Plain on Monday, Thursday and Saturday afternoons, from 1 to 4.15.

Dr. L. Faunt Jones wishes to announce that he has moved his office to new quarters over Kelly's new store and his residence to four doors west of Oppert-Hansen's store. Phone Residence No. 1. Office "Kelly store."

The Constitution meeting of the Women's Institute will be held on Friday, Oct 20th, at Woodland, instead of in September, as formerly.
